

Maths:

Children will continue to consolidate their understanding of number. They will be looking closely at place value and strategies for adding and subtracting numbers. We will also focus on multiplication and division.

Science:

Our topic this term is materials. Children will develop their understanding of materials and their properties. They will be given the opportunity to strengthen their scientific enquiry skills. We will hopefully go on an exciting school trip to explore some important inventions.

Geography:

Children will use aerial photos to recognise landmarks and basic physical features.

Music:

During Music lessons, we will continue to use a variety of musical instruments and rehearse simple melodies.

REAL Dance and PE:

This term we are focusing on the 'COGNITIVE' cog which involves making good decisions, understanding simple tactics of attacking/defending and analysing performance.

Year 2
Spring Term 2023

Inventors and Pioneers

History:

Researching and learning about inventions that have improved everyday life and pioneering people from different periods of time.

Literacy:

During this term, children will write for a variety of purposes. For example, they will be writing their own adventure stories using Mrs Armitage on Wheels as their stimulus. They will also be looking at information texts and persuasive writing.

Computing:

- Keyboard skills
- Children will also learn about the importance of e-safety.

Art/ DT:

We will be learning about the famous artist Picasso who was a pioneer in the world of Art. They will also be using textiles to make their own product for a DT project.

RE

- Islam and Christianity
- The Easter story will also be read to the children.

PSHE:

- The value of friendship and the qualities needed to be a good friend.
