TBAT: measure using non-standard units

Carry out your own investigation at home using different non-standard units of measure. You can measure whatever you like in your home/garden and may wish to compare how different non-standard units give different results.

What can you use to measure?

- Hands
- Feet
- Cubes
- Lego
- Body
- Arms
- Legs
- Books
- Colouring pencils
- And many, many more!

Below are some photographs to give you some ideas. We cannot wait to see your photographs soon!
