

Set yourself 3 **maths targets and goals** for Year 7. 

Think about an area of maths that perhaps you would like to practise a little more and get better at next year or maybe think about an area of maths that you are looking forward to learning more in depth- or maybe even a new area of maths that you haven't learnt anything about yet!

Make a **poster** to tell your next teacher all about you!

Use your maths skills to write clues to give them information about you but without giving them the answer- they need to work that out themselves. You could think about:

- Your birthday
- Your height
- How many siblings you have
- Your house number
- Your favourite/lucky number

You might be able to think of more ideas too!

E.g. My favourite number is a prime number, it is a factor of 20, it only has one digit, it is the square root of 25.

<https://myminimaths.co.uk/year-6-to-7-mini-maths/>

Have a go at these activities that are designed specifically to help you with the transition from Year 6 maths to Year 7 maths.

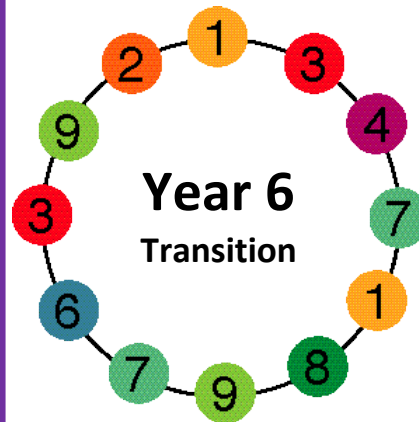

There are **mini maths tasks** for different areas of maths so you could have a go at following them all or pick some that you would like to try.

Plan a summer holiday without going over your budget- £1500! 

You decide how many people are going, how long you're going for and what type of holiday you'll have.

The more money you have left over, the more you have to spend when you get there!

You'll need to think about travel (and return), where you'll stay, who is going and how many rooms you'll need, food and maybe even some travel insurance!

See if you can remember all of the different areas of maths that you have learnt during your time at Primary School!

Make yourself a list- don't forget, some things you will have learnt every year and some things may only have been introduced as you got older. What has been your favourite area of maths to learn about? Can you say why?

Do you have any particular memories of any of your maths lessons- could be a funny memory or a lesson you enjoyed? (Your Eastbrook teachers would love to hear some of these! 😊)

<https://www.teachwire.net/news/42-maths-teasers-for-ks3-4-a-puzzle-a-day-for-the-summer-holidays>

Have a go at these **maths teasers**- there is one for each day of the Summer Holidays (roughly!) 

<https://www.bbc.co.uk/bitesize/subjects/zqhs34j>

This is **BBC Bitesize for Year 7**- you could take a look to see what you might be learning about next year and even get a head start if you wanted to!
