

# Maths Pack 2: Year 3

This week, practise your 3,4 and 8 times tables! Here are some activities to help you:

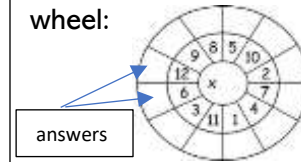

**Speed tables! How quickly can you write or say the answers to a times table you are learning?**

Create a simple times table board game! You could do your own version of snakes and ladders or noughts and crosses..

Make a times table wheel:

Website:

<https://www.sumdog.com/>

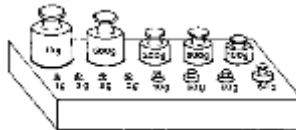

## Pair me up!

Match up the lengths that are equal in size:

1m	1000m	10cm
100mm	10mm	
1km	100cm	
	1cm	

This week's maths topic is...

## Measures and Money

## Show me the money!

Use exactly 5 different coins to make each amount. You can only use the same coin once!

30p                      28p                      £3.00  
£1.50

Is there a different amount you can make with 5 different coins?

**Convert me!** Look for 'g' and 'kg' on any food packaging in your kitchen (ask for permission!). Compare how heavy they are and put them in order of weight.

(You can do the same activity for 'ml' and 'L' by looking for drinks like milk or orange juice)

## Pounds and Pence

Add pairs of amounts together and show the answer in £. *Example 65p + 45p = £1.10*

80p	25p	75p
55p	95p	
60p	30p	15p
	45p	

*Challenge: which pair adds to £1.05?*

## Shop 'til you drop!

Make a price list for your own themed shop. Give each item a selling price under £5 e.g. £2.35

Then work out the change a customer would get for each item if they paid with a £5 note.
