

24.2.21

Collect data

What you will need:

- You will need a reading book
- Ruler
- Pencil

Use a page from your reading book to collect the data and add it to the frequency table.

Survey of word length in my book						
1-letter words	2-letter words	3-letter words	4-letter words	5-letter words	6-letter words	More than 6 letters

Now use this information to create a bar chart.

We have provided a template for your bar-chart.

Once you have created your bar-chart.

You will need to answer these questions.

- 
- 2 What is the most common length of word?
 - 3 What is the least common word length?
 - 4 Which lengths of word occur the same number of times?
 - 5 Is any length of word twice as common as another?

If you did the same survey for name length, how different would your findings be?
